FOR IMMEDIATE RELEASE

**INNOVO's Visionary Approach Redefines Oil & Gas Sector with
Zero-Carbon Emissions Technology**

New York, NY January 10, 2024 – INNOVO is at the forefront of a major industry shift with the unveiling of a novel technology set to dramatically curb the oil & gas industry's carbon footprint. With a record 18.7 billion tonnes of CO2 emissions in 2022, the demand for sustainable methods in energy production is at an all-time high. INNOVO's net-zero emission technology is the key to unlocking a sustainable future for the oil & gas industry.

Our full-service model ensures that transitioning to sustainable practices is seamless for oil & gas companies. INNOVO's strategy is to handle all aspects of the transition: we will finance the project, construct the facilities, and oversee operations. This approach removes financial barriers, allowing energy producers to modernize their operations and significantly cut emissions without the immediate financial outlay.

INNOVO's technology is not just about meeting today's environmental standards; it's about leading tomorrow's energy revolution. We are dedicated to enabling the oil & gas sector to produce energy that meets the highest sustainability criteria, providing a blueprint for the industry to align with global net-zero targets.

This initiative underscores our belief that environmental responsibility and economic growth can go hand in hand. By fostering partnerships with oil & gas companies, we're not just transforming industry practices; we're also ensuring that these companies are well-positioned to thrive in a low-carbon economy.

For more information on how INNOVO is driving the zero-carbon transformation in the oil & gas industry, visit [our website](#).

About INNOVO: INNOVO is an industry leader in sustainable energy solutions, focusing on developing cutting-edge technologies that enable the transition to net-zero emissions. We are dedicated to supporting our partners in achieving their environmental objectives, while fostering innovation and economic resilience.
